

Pentagon Global Diversified Bond Fund

APRIL 2025

THE FUND:

Pentagon Global Diversified Bond Fund Limited is incorporated as an exempted company under the laws of Bermuda and is authorised as an administered fund under the Investment Funds Act 2006 of Bermuda.

OBJECTIVE:

The principal objective of the Fund is to provide shareholders with an opportunity to invest in a portfolio of predominantly investment grade debt and higher yielding securities that produce regular income and long-term capital appreciation.

INVESTMENT APPROACH:

To achieve its investment objectives the Fund invests in debt securities that consist principally of bonds and asset backed securities. The investment focus is on corporate rather than sovereign debt. In order to diversify the Fund's investments, the Fund invests in securities across different countries, currencies, industries and sectors. This allows the investment manager to reduce the risk that the Fund is not exposed to one particular sector or currency and therefore improves the Fund's overall risk adjusted return.

FUND LETTER APRIL 2025

PERFORMANCE

In April, the Pentagon Global Diversified Bond Fund (the "Fund") decreased by 0.6%, compared to a return of 0.0% for the US High Yield Index and the US Investment Grade Index.

Year to date, the Fund returned 0.8%, compared to 0.9% for the US High Yield Index and 2.3% for the US Investment Grade Index.

Since its inception, the Fund has returned over 149.9% in total, or 7.2% annually, versus 105.0% for the US High Yield Index and 50.2% for the US Investment Grade Index.

FUND POSITIONING

Donald Trump's announcement of tariffs on 2 April certainly threw the cat amongst the pigeons. The tariff announcements were far larger in magnitude than even the most far-fetched estimates. In response, the fund very quickly sold down some riskier positions in order to protect fund performance. We cautiously added back as the month wore on and Trump increasingly rowed back with delays and exceptions, although we remain lower risk at the end of April than we had been coming into the month.

Duration is at 2.5 versus 3.1 in March. Average credit quality has increased to BBB+.

The fund remains overweight sovereign debt and cash.

As always, the Fund continues investing where we see the most significant return while minimising the risk of medium-term capital impairment.
